American Water Works Association

AWWA FLORIDA

Florida's Water Professionals

Dear FSAWWA Member:

2014 marks the16-year anniversary since April was first established as Water Conservation Month in Florida. During this time, we have made great strides towards understanding the impacts of water efficiency and water conservation programs. To recognize these efforts, the FSAWWA and Florida's Water Management Districts are once again asking local governments, water utilities and other organizations to adopt a resolution or proclamation declaring April as Water Conservation Month and then report this back to the FSAWWA.

It is important that you add your Water Conservation Month Proclamation to the Statewide List NOW. In April this list will be presented to the State Governor and Cabinet in support of Florida's resolution declaring "April as Water Conservation Month". This is an excellent opportunity to have your efforts in water conservation recognized!

By adopting Water Conservation Month and adding your proclamation to the Statewide List, you are letting Florida's elected officials know just how important water efficiency and water conservation practices are to local governments, water utilities and other organizations in Florida.

To add your proclamation to the Statewide List of entities proclaiming Water Conservation Month this year, please email your adoption date to Jenny at fsawwa.jenny@gmail.com. Sample proclamations are available on the FSAWWA Water Use Efficiency Division (WUED) webpage to assist in your adoption efforts.

Your continued support of water conservation and water use efficiency in Florida through participation in this 16th annual event is appreciated!

Sincerely,

Lisa Krentz
Chair, FSAWWA Water Use Efficiency Division
